COLORING OF PLASTICS WITH ABABATCH OF ABAKUS SERVE

ABAKUS SERVE provides high-quality, dispersive, polymer-specific and also general-purpose color masterbatches for coloring and optimization of thermoplastics.

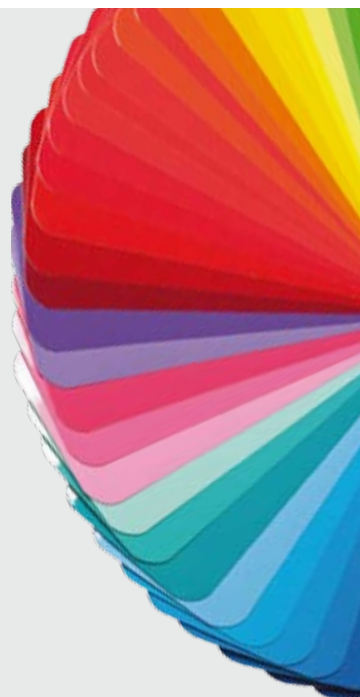

Our batches are used in numerous areas – such as by injection molding, extrusion, thermoforming, in the compounding, film production etc.

Our extensive range includes:

- **Black batch**
- **White batch**
- **Terracotta batch**
- **Standard color settings according to Pantone, RAL, HKS etc.**
- **Special color settings specific to customer**
- **Additives such as e.g. UV stabilizers, flow aids, lubricants**

If you have a specific problem or a special request, our competent staff can also advise you on the spot.

In long-standing cooperation with selected and experienced partners, we ensure a quick and quality-conscious realization of your requirements. Even special colors are possible in a few days. Together with our logistics partners, we also provide short delivery times. Ongoing quality controls ensure a smooth processing of our products – also in your company.
